# Things we have learned...

- Health workforce is (still) on the agenda
- “More staff” is easy to achieve; “working differently” is not...but new roles are prominent
- Integrated workforce planning never happened; care group planning the way forward?
- A national pay system is easy to manage and (perhaps) low cost, until you try and change it
- Primary care is the future...back to the future
- Its the economy, stupid (its productivity, stupid)
